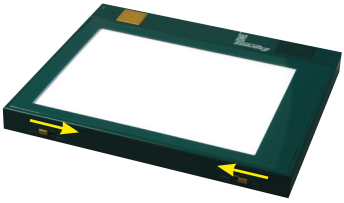
Attainment Company's

Express ONE™

user's guide

Set-Up

1. Insert the two AAA batteries into the compartment on the back of the unit.
2. To insert a picture, slide both gold latches from LOCK to OPEN. Lift the frame. Two black plastic framing mats are included so you can use pictures in three sizes: 3″ x 5,″ 4″ x 6,″ or 5″ x 7″.
3. Remove and set aside mats you are not using.
4. Insert the picture, making sure it's facing the right direction.
5. Put the frame back in place, and slide both latches back to LOCK.



How to Record

1. Find the gold latch on the back of the unit. Slide the latch to REC. Turn the unit over.
2. When you are ready to record the message, press and hold the center of the picture area. (Pressing the square gold button will not activate recording). While the picture is being pressed, a red LED will light, indicating that the unit is recording.
3. Speak clearly into the MIC next to the LED, and record a message up to 10 seconds. When you finish speaking, stop pressing on the picture. The LED will go out when you stop pressing on the picture or when time runs out, indicating that recording has stopped.
4. Turn the unit over and slide the gold latch from REC to PLAY. The Express One is now ready to use.

How to Play a Message

1. Press near the center of the picture. Release as the message begins. The activation area is quite large, but does not extend to the edges of the picture.
2. The message can also be activated by pressing and releasing the square gold button next to the LED.

Ideas for Use

Talking Sign

The Express One can be used as Talking Sign. Two wall mounts are built into the back of the unit, so it can be hung either vertically or horizontally.

Put one on each classroom door to identify the room. *"This is Mrs. Garcia's room. This is where we have Art."*, for example. Or hang the talking sign wherever there are informational or safety signs that not everyone can read or understand. *"This is the boy's bathroom."*

Talking Picture

Have an Express One for each student in the class, with a student's picture in each unit. You can record messages for students to check each day. *"You had a great day yesterday. Keep up the good work! Don't forget Mrs. Kovacs will be here to see you this afternoon."* or *"Welcome back! We all hope you feel better now."*

Easy Access Single Message Talker

Because of the large image and play area, the Express One is ideal as an inexpensive single message talker!

Insert a picture and record a related message. *"This is a dog. A dog says, 'Woof.'"* or *"Lunch today will be Turkey Wrap, Mixed Fruit and Yogurt."*

Use two units for choices. For example, a "yes" unit and a "no" unit for answering yes/no questions.

For reassurance or reward, have a picture of a favorite pet, relative or friend. *"Don't worry, you're OK and everything is fine"* says grandma, or *"Fluffy will be happy to see you when your day at school is done."*
